# Cairn Hill Ore Body Reached

At the **IMX** Cairn Hill iron ore Trial Mine, the top of the ore body has been exposed.

The overburden so far has all been 'free dig'.

The high grade magnetite with copper /gold content will soon be extracted and crushed on site, 50 km south of Cooper Pedy, before going by road train under the Stuart Highway to the Adelaide-Darwin railway line and then to Darwin, and then to China.
